

See it on your table *before*
you order.

QR code
(run with --domain
to add)

Point your camera at the code.
No app needed.
Order se pehle dekh lo.

HOW IT WORKS

1 Scan the code

The menu opens on your phone. Safari or Chrome, no app.

2 Tap a dish

The real dish comes into focus. Turn it with one finger.

3 See it on your table

Place it in front of you at its true size, then decide.

4 Show the waiter

Add dishes and notes to your list, then turn your phone to the waiter.

Opened it from Instagram? Tap the three dots and choose *Open in external browser* for the table view.
