

See it on your table.
Then order it.

Menus describe food. *Guests have to guess.*

"What does it look like?"

"How big is it?"

"Is it enough for two?"

"Which one should I get?"

Every one of those questions is a guest who isn't sure yet, and a waiter describing a plate instead of hosting.

Food is chosen on a phone *before it's ordered.*

For Gen Z, Instagram is where the decision about where to eat starts. Diners look up menus before they go, and 18 to 24 year olds look for food photos more than any other age group.

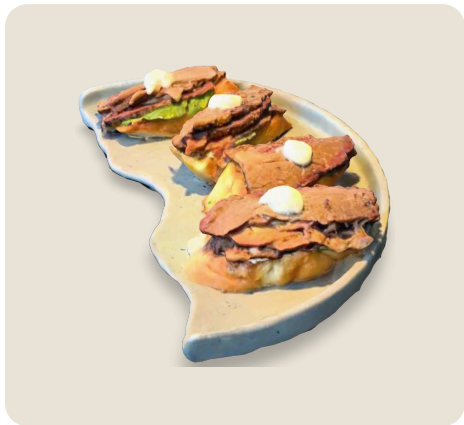

Sources: Tastewise, Gen Z food trends (2026); Restaurant Dive, US diner survey (77% check a restaurant website before visiting; ~60% of 18–24s look for food photos). US data, shown as direction, not a Lahore number.

Outside research, not a MENVA result: in a restaurant field study, 41.2% of diners ordered dessert when they saw it in AR on their table, vs 18.0% with a regular digital menu (101 diners, one restaurant).

Fritz, Hadi and Stephen (2023), "From tablet to table: How augmented reality influences food desirability", *Journal of the Academy of Marketing Science* 51, 503–529.

QR. Tap. *Dish on the table.*

1· Scan the table QR

The menu opens in the browser. No app.

2· Tap a dish

The real dish comes into focus. Turn it around.

3· See it on the table

Placed in AR at true size, then they decide.

REAL SCANS, TRUE SIZE

Your chef's plating, *not a stock photo.*

- Every dish is a 3D scan of a real plate from your kitchen
- In AR it sits at its true size and can't be pinched bigger
- Honest portions build trust before the plate arrives

Nothing changes for your team, *except fewer questions.*

No app

Opens from the table QR in Safari or Chrome.

Slow wifi

The dish photo shows first; the 3D follows.

Waiter in charge

No online ordering or payment. Guests show the waiter a list.

Every phone

No AR on a phone? Guests still turn the dish in 3D.

WHAT YOU SEE

Real numbers from *your own tables.*

01

Tables that scanned the QR

02

Which dishes guests opened

03

Dishes placed on the table in
AR

04

Lists shown to your waiters

A private results page for the pilot, per day and per dish.

From your kitchen to *their table*.

01

Your signature dishes, in 3D

Real plates, scanned and checked.

02

A QR on every table

Printed codes that open your menu.

03

Guests see it, staff take the
order

Service stays exactly as it is.

04

Review the results together

What guests opened, placed and
showed.

LAHORE PILOT

PKR 25,000

See your own dishes on your own tables, with real numbers from real guests.

NEXT STEP

Try it on *this table*, right
now.

Scan the code, tap a dish and place it in front of you.
